

DESCRIPTION

Specifically formulated and nutritionally balanced for yearlings and broodmares.

13.5% protein, textured “sweet feed,” with added fat designed to promote proper development of the growing horse over 12 months of age.

Ideal for gestating mares to provide optimal development of the foal in utero, and lactating mares to maximize milk production.

FEEDING DIRECTIONS

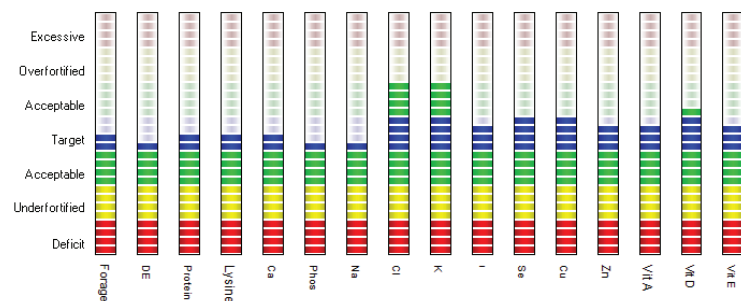

Refer to the feeding table below for typical intakes for growing horses based on the expected mature size and age of the young horse. Feed pregnant broodmares in their 2nd and 3rd trimester of pregnancy 0.5 - 0.75% of body weight per day. Feed lactating mares 0.6 - 1.2% of body weight per day. Amount required will depend on horse’s metabolic rate, body condition, weight, average daily gain, etc.

- Limit meal size to 0.5 lb per 100 lb body weight.
- Feed in combination with a 1.0–1.5 lb of good quality forage per 100 lb. body weight per day.
- Allow free-choice access to fresh, clean water and salt.

SIZE OF HORSE	FEED INTAKE PER DAY (LB.)		
	400-600 LB.	1000-1200 LB.	1400+ LB.
EXPECTED MATURE SIZE			
YEARLING	N/A	5-10	6-10
PREGNANT MARE	2-4	5-9	6-11
LACTATING MARE	3-7	6-14	8-17

SAMPLE DIET

Age: Yearling (12 months) Equus Junior 7 lb.
 Weight: 800 lb. Mixed Hay 13 lb.
 Average Daily Gain: 1.2 lb.
